BUILDS A STRONG FOUNDATION

Everything needed to begin modular workholding from day one.

PERFECT FOR FIRST-TIME USERS

Simplified selection — ideal for operators new to Swiss-type setups.

SIMPLIFIES SELECTION

Pre-configured components eliminate compatibility guesswork.

CREATING YOUR PART

When ordering your Swiss Modular starter kit, the part number is built using the components you select.

Example:
PCSET18-250A 01 PCSET18-N1 B48-20

1. Base Rail: PCSET18-250A
   PCSET18- prefix, then length + height code (250mm/35mm = 250A)
2. End Module: 01
   Choose the module with the jaw style and dimensions you need.
3. Clamp Module: PCSET18-N1
   PCSET18- prefix, then select your module type, jaw type, and size.
4. Steel Parallels: B48-20
   B48 or B94 width, then height.
